

Eric Lindquist, Texas A&M University (George Bush School of Government and Public Service)

Eric Lindquist, Ph.D. is the Associate Director and Associate Research Scientist for the Institute for Science, Technology and Public Policy, George Bush School of Government and Public Service at Texas A&M University. He received his Master of Urban Planning and Ph.D. in political science from Texas A&M University. Dr. Lindquist's research interests are in public policy and decision processes, agenda setting, problem/solution definition studies, and the impact of focusing events on public policy. His most recent projects are in the area of climate change, the use of climate science in intergovernmental decision making, the public understanding of science in regard to global climate change, and on nanotechnology. He is currently co-PI on major grants for NOAA and the EPA focusing on the utilization and understanding of climate variability and climate change science. Prior to joining ISTPP full time, Lindquist held a joint appointment with ISTPP and the Texas Transportation Institute, where he worked for 10 years in the areas of transportation planning and policy. He was recently a principal investigator on a joint USDOT and USGS project examining the impact of climate change on transportation infrastructure along the U.S. Gulf Coast. Dr. Lindquist has taught undergraduate policy and planning courses for Texas A&M University, and Capstone courses for the Bush School. He teaches BUSH 671: Science and Technology Policy and Politics, and is currently the faculty advisor for a Capstone project on institutional and regulatory capacity for adaptation to climate change for the Houston Galveston Area Council.
