

COMPASS Amendment #2 FY2018-2022 Regional Transportation Improvement Program

The Ada County Highway District (ACHD) Commuteride program requested removal of additional vehicles to expand the Commuteride program. ACHD has determined additional Commuteride van routes are not needed in the Nampa Urbanized Area through FY2021.

Valley Regional Transit (VRT), in coordination with the City of Nampa, designed improvements to the entrance and roundabout at the College of Western Idaho. The final engineer's estimate requires additional funding to complete the project.

VRT is also working with the City of Middleton on a park and ride lot and bus shelter at Piccadilly Park. The bid came in higher than the engineer's estimate. The city requested additional federal funds to complete construction.

VRT is working with the City of Nampa to develop a Transportation and Community Services Hub – Transit Oriented Development. The city requested federal-aid funding to begin design and environmental work on the project, which will use an existing building to create a central transportation and community services hub in an economically depressed area in the City of Nampa. The renovation of the facility will include an integrated system of "active transportation" improvements to help revitalize Nampa's adjacent neighborhoods and major activity center to drive the economic resurgence of the city and region. Construction is currently considered "unfunded," and will be added as funds become available. The project addresses part of the *Communities in Motion 2040* (CIM 2040), the regional long-range transportation plan, unfunded priority #11: valleyconnect near term improvements. An amendment to CIM 2040 is also required to add this project.

VRT requested to remove a Safe Routes to School coordinator project in Canyon County for FY2018. The funding source is not eligible for this project. The vendor, YMCA, had staffing turn-over throughout the year, and will be able to continue the program in FY2018 with existing funds, based on the program using fewer staff days than expected.

The Idaho Transportation Board made a recommendation on December 14, 2017, to allocate the remainder of the GARVEE bonding authority and various sources of state and federal funds to continue safety and capacity improvements to the I-84 corridor between the Cities of Caldwell and Nampa. The scope of improvements between the Cities of Caldwell and Nampa and the improvements that may be needed in the City of Caldwell are not yet known; however, the ongoing study will determine the scope of the improvements. Widening I-84 between the Cities of Nampa and Caldwell is the #1 unfunded corridor in CIM 2040. An amendment to CIM 2040 is also required to add this project.

On December 14, 2017, the Idaho Transportation Board also made a recommendation to allocate \$6 million state funds for preliminary engineering on the extension of State Highway 16 between I-84 and US-20/26. These funds will refine the scope, right-of-way needs, and cost estimate for the corridor. The remaining design, right-of-way acquisition, and construction is currently unfunded; previous estimates place construction costs at approximately \$400 million. Extending State Highway 16 from US 20/26 to Interstate 84 is the #14 unfunded corridor in CIM 2040. An amendment to CIM 2040 is also required to add this project.

Please see funding details for each of these requests on the following pages.

Per ACHD, September 28, 2017

Key No	Project	Scheduled Costs (including Match) (costs in \$1,000)							
		Cost year	PE	PEC	RW	UT	CE	CN	SUM
20153	Commuteride, Van Replacements Vehicles and Expansion , Nampa Area – FY2018	2018						759 337	759 337
	Funding Source: FTA 5307 SU Replace Commuteride vehicles that are beyond their useful life and expand the fleet in the Nampa Urbanized Area. FY2017 funds carried over to FY2018. (Federal = \$297,000) Decrease CN by \$422,500 to remove the expansion portion of the project. Move funds to KN 19609 and KN 19297. Adjust title and description to reflect the change.	2019							0
