

# Site Selection Process: Next Steps

- The study team and project advisory committees will evaluate both sites based on technical analysis and public input. A recommended site will be submitted to:
  - ACHD
  - City of Boise
- The City of Boise will host a public hearing at 6 p.m. on Tuesday, March 10 at the Boise City Council Chambers (150 N. Capitol Blvd.).
- The Valley Regional Transit Board will make a final decision about the site location based on input from ACHD and the City of Boise. The environmental document, which includes the preferred location, will be submitted to the Federal Transit Administration (FTA).
- Design and construction can begin after the environmental document is approved by FTA.
