

Meet the Speakers

Peter Eun

Peter Eun is a Transportation Safety Engineer with the Safety and Design Technical Service Team in the Federal Highway Administration's (FHWA's) Resource Center. He is based out of Olympia, Washington. Peter is currently a co-lead for the "Every Day Counts - Safe Transportation for Every Pedestrian" initiative, as well as a co-lead for the Pedestrian and Bicyclist Safety Focused Approach to Safety. He develops and delivers training on topics such as such as STEP (Safe Transportation for Every Pedestrian, Designing for Pedestrian Safety) and complete streets, in addition to working on projects and conducting road safety audits/assessments. Peter has been with FHWA for 21 years and most of that time has been working to save lives.

Brooke Struve

Brooke Struve is a Safety and Design Engineer in FHWA's Resource Center. She is based in Colorado, but provides technical assistance and training nationwide on design flexibility, performance-based design decision-making, and designing for the safety of pedestrians and bicyclists. Prior to joining the Resource Center, she was on the Preconstruction Team in FHWA's Office of Infrastructure. There, she worked to advance best practices in the design discipline across the agency and provide technical support for Interstate access, geometric design, and accessible design for disabled pedestrians. Brooke has worked as a project manager for FHWA's Eastern Federal Lands Highway Division and as a team leader for the Utah Department of

Transportation, leading the development and design of projects ranging from low-volume recreational roads to urban arterials and freeways. Brooke has a BS in Civil Engineering from Brigham Young University and is a licensed professional engineer in the State of Utah.
